SPYNT
GROUP

If your restaurant or bar needs temperature controlled storage for frozen and chilled food items, our clean, safe and economical cold rooms offer the perfect solution.

Sprint Group can supply cold rooms and freezer rooms to fit any individual space.

As part of a complete design and build package, we can also install external fridge plant and carry out all necessary electrical services and refrigerant pipe work.

Ongoing maintenance of the cold rooms is hassle-free thanks to a white, food safe finish on both internal and external surfaces and plated floor surface.

All cold rooms are CFC free and closed-cell polyurethane is pressure injected between metal skins to form cam-lockable, easy to handle panels.

Specifications

Chiller cold rooms

- 80mm polyurethane insulation
- 80mm chiller panels with a thermal transmittance (U-value) of 0.24 W/m²K.
- Optional insulated floor with a choice of floor finishes over a plywood sub base: aluminium chequerplate, flat galvanised, rigidised galvanised, rigidised aluminium or stainless steel
- Hinged or sliding insulated doors with industry standard furniture and fittings

Freezer cold rooms

- 100mm polyurethane insulation
- 100mm freezer panels with a thermal transmittance (U-value) of 0.19 W/m²K - 100mm insulation is recommended for kitchens to avoid potential condensation
- Insulated modular floor with a choice of floor finishes over a plywood sub base: aluminium chequerplate, flat galvanised, rigidised galvanised, rigidised aluminium or stainless steel
- Hinged or sliding insulated doors with industry standard furniture and fittings, complete with low voltage heater tape to threshold
- Pressure relief valve installed within wall panel

Turnkey installation service

- Project managed installation from start to finish
- Removal and disposal of old cold and freezer rooms
- Internal and external refrigerant pipework fitted
- Design and drawings service available
