Stay cool with Sprint

Trust Sprint Group to deliver the perfect ventilation system for your hard-working commercial kitchen.

With more than 20 years design and installation expertise under our belt, we will take care of all drawings and planning applications.

We can provide a wide selection of high quality and energy efficient products from the world's leading brands.

Our extensive range of products includes:

- Exhaust hoods
- Condense canopy/hoods
- Filtration units
- Recirculation units – electric equipment only
- Gas interlock
- Heat recovery
- Odour/grease/smoke control
- Fire suppression
- Noise control
- Extract and supply air systems.

Sprint's qualified and experienced heating, ventilation and air conditioning specialists will manage the process from start to finish to ensure that customers' exact requirements are met and that everything runs smoothly.

All installations comply with the standards laid down in DW172, which is the definitive guide to kitchen ventilation systems in non-domestic premises and comprises up to date industry specifications for HVAC specialists.

When the installation is complete, our service team is on hand to provide training and support, regular equipment maintenance and 24/7 emergency assistance if required.
